PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience in front-end development, Java, Python, and software testing. Skilled in building responsive web applications and developing innovative projects involving OCR, Blockchain, and automation. Strong problem-solving abilities, a passion for learning new technologies, and a commitment to delivering efficient, user-focused software solutions in a dynamic development environment.

EDUCATION

Sri Ramakrishna Engineering College — **Coimbatore | 2023 – 2027**
B.E. Computer Science and Engineering | CGPA: 7.3

Coimbatore Public School (CBSE) — **Coimbatore | 2022 – 2023**
Higher Secondary Certificate (HSC) | Percentage: 61.6%

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Frontend: HTML5, CSS3, JavaScript, React.js, Responsive Web Design, UI/UX
Backend: Spring Boot, Flask
Databases: MySQL
AI & Machine Learning: OCR, RoBERTa, NLP
Software Testing: Manual Testing, Automation Testing
Tools & Platforms: GitHub, VS Code, Android Studio, Postman
Core Concepts: Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, REST APIs

PROJECTS

OCR Accuracy Enhancement Using RoBERTa-based AI Model — *Python, RoBERTa, NLP, OCR*

- Developed an AI-powered post-processing system that improves OCR text accuracy using the RoBERTa language model.
- Corrected character- and word-level recognition errors by leveraging contextual language understanding.
- Enhanced the quality of scanned documents, books, and forms through intelligent text correction.

CiviSnap – AI-Powered Civic Issue Reporting System — *App Development, AI*

- Developed an AI-powered platform that lets citizens report civic issues such as potholes, garbage, and damaged streetlights through image uploads.
- Integrated AI-based image analysis to identify and classify issues and generate descriptions before forwarding complaints to the appropriate government department.
- Implemented real-time complaint tracking, secure user authentication, and an admin dashboard for monitoring and resolving reported issues.

LifeLine – Emergency First Response System — *React.js, Python, Flask*

- Developing a mobile application that connects nearby physicians with heart attack patients during medical emergencies.
- Implementing a one-tap SOS feature with live location sharing for faster emergency response.
- Aiming to reduce response time by enabling immediate first aid before an ambulance arrives.

ACHIEVEMENTS

- Winner – Tech Accelerate Hackathon, BITS Pilani, Hyderabad, for developing a Candidate Voting System using Blockchain, recognized for its secure and transparent digital voting solution.
- Completed dual-domain internships in UI/UX and Front-End Web Development, gaining cross-functional industry exposure.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate – Udemy
- Infosys Certified Scrum Master – Infosys Springboard
- Software Engineer – Infosys Springboard
- Agile Software Development – Infosys Springboard
- Programming in C – Skillrack
